LOCAL CALLING APPLICATIONS

STRATUS HAS AN OPTION TO FIT THE NEEDS OF ALL BUSINESSES, BIG OR SMALL. WHETHER YOU NEED ONE CIRCUIT THAT CARRIES ALL OF YOUR VOICE AND DATA OR IF YOU HAVE A CALL CENTER, WE HAVE A SOLUTION FOR YOU.

- Connect to your PBX for local, intrastate and interstate voice calling
- Use integrated access to handle your data needs on your voice circuit
- Call center tracking
- Router management on the Internet
- E911 compliant
- Digital solutions for higher call quality

LOCAL CALLING OFFERING

Local T1 - Stratus Networks offers full traditional 24 channel voice T1s. These lines are perfect for customers that have only one type of traffic -- in-bound or outbound.

Local PRI (ISDN) - These circuits are generally configured as 23 B channels +ID channel. This allows 23 usable voice channels with a separate D channel for transmitting data such as caller ID information. The dynamic ability of the ISDN to allocate incoming and outgoing calls allows for better utilization. These circuits provide crystal clear voice due to the digital nature.

Integrated Access - Stratus will provide your company with a full communications solution by combining local, long distance and Internet access all of the same circuit. These circuits can be configured in many different combinations of voice to data and tailored to meet the specific needs of the individual customer. This provides the ultimate in flexibility!

- Traditional 24 channel T1s
- ISDN PRIs
- Integrated access with all equipment provided
- All products with local, intrastate and interstate calling ability
