ABOUT STRATUS NETWORKS

Stratus Networks, Inc. is a leading national provider of data, voice and Internet services to all sizes of businesses and government agencies. Offering unparalleled support and an extensive selection of innovative solutions, Stratus Networks has grown to become a premier carrier in the telecommunications marketplace. For more information about solutions, service or pricing please contact your Stratus Networks representative directly.

Say “so long” to the phone equipment room of yesterday and hello to a flexible, highly scalable and affordable virtual Cloud PBX Platform. The Stratus Hosted PBX solution provides cost savings with no infrastructure headaches. If you’re tired of dealing with an unwieldy proprietary phone system that consumes much of your IT resources just to maintain, then perhaps it’s time to move your phone system to the Cloud. The success of this cloud-based technology system primarily lies in the flexibility of communication, as the Hosted PBX solution does not require any additional on-premise telephone equipment. With Stratus, you are assured of having a state-of-the-art platform for all your voice communication needs.

KEY BENEFITS

Costs and Savings – When compared to conventional telephone services, the Stratus Hosted PBX solution offers many cost benefits. Hosted PBX eliminates the need for large upfront investments in telephone systems, so you can avoid a big capital expenditure yet still get the latest technology. Unlimited local and long distance included in our monthly fee per seat reduces operational costs. No maintenance fees or annual licensing leads to a significantly lower cost of ownership.

Mobility and Portability – Today, most business organizations are extremely mobile. Instead of being tied down to a fixed telephone line, our Hosted PBX solution allows your employees to carry communication devices everywhere, ensuring no one is ever out of touch. This creates opportunities for employees to work from anywhere while accessing the virtual telephone system.

Scalability – For any successful business organization, growth is inevitable. Naturally, your resources need to be able to expand as well. Unlike traditional phone systems, where you either paid for more than you needed to allow for future growth, or you had to go through a fork lift upgrade to grow your system, our Hosted PBX system can be scaled up in no time. With Hosted PBX solutions, scalability is assured and is something that a business organization can rely on.

Hosted PBX

KEY BENEFITS (continued)

Simplicity and Ease of Use – Premises based telephone systems can take days or even weeks to be configured and installed. Instead, when you opt for our Hosted PBX, your new system will be up and running in no time. With the Hosted PBX infrastructure, the simplicity and user-friendliness mean that every employee will be familiarized with its features right away and will then enjoy the cutting-edge technology at their fingertips. Our online portal gives users and administrators easy access to configure handsets and features, as well as make changes any time. Office relocations and employee turnover can be done by the administrator in minutes.

Business Continuity – Your company cannot afford disruptions. But of course, disruption does happen due to many reasons; natural disasters, technological faults, failure of communications systems and even security breaches. But when a business has an effective, secure, and reliable Hosted PBX services to fall back on, business continuity can be secured. There is no physical system stored on the premise of the organization. So, if your business is hit by a catastrophe, you can rest assured that your communication system will be up and running. Our switch is designed with Geo-Redundancy to provide high availability across geographic locations, mitigating the risk of outages.
