

Express Connect

Stratus Express Connect is a cloud service solution that makes it easy to establish a dedicated network connection from your premises or Stratus MultiLinQ core to several cloud providers. Using Express Connect, you can establish private connectivity between a variety of providers including; Amazon, Microsoft, Google – and your data center, offices, or collocation environment. In many cases this can help to reduce network costs, increase performance, add security, and provide a more consistent network experience.

Key Benefits

Private Connectivity – High speed, low latency bandwidth, directly to your cloud provider or datacenter of choice.

Elasticity – Easily expand and upgrade your bandwidth as your needs change or business evolves.

Security – No need to rely on an open Internet connection or VPN to access your cloud services.

Consistent Performance – Network latency over the Internet can vary at any time. You design the proper bandwidth to effectively run your applications, and it's dedicated.

Simplicity – Working with the Stratus engineering team to design this solution is very unassuming, with a user-friendly interface.

ABOUT STRATUS NETWORKS

Stratus Networks, Inc. is a leading national provider of data, voice and Internet services to all sizes of businesses and government agencies.
